Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. The reply filed on 10 November 2003 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): the amendments to the specification and claims do not comply with the patent rules. The amendments should comply with See 37 CFR 1.111 which has been in effect since July 2003 (see attachment). Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

2. The following discrepancies have been noted in the filed Amendment:

- **Priority:** Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 119(e) as follows: An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)).
- **Drawings:** The drawings are objected to because they do not include corresponding reference sign(s) for a clear understanding of the various structural components involved in the present invention. The drawings should have reference sign(s) corresponding to the reference sign(s) in the disclosure in order to adequately explain what is being shown in the figures. It is noted that reference numbers have been included in Figure 3. However, the same must be done for all drawings.

Art Unit: 3711

- ***Specification:*** The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet **within the range of 50 to 150 words**. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The (a) TITLE OF THE INVENTION and (b) CROSS-REFERENCE TO RELATED APPLICATIONS, should appear on the first page of the specification.

It is still unclear if "HEATBALL" is a Trademark or if it is only an arbitrary name given to the claimed invention. Clarification is requested.

In the Office Action dated 08 August 2003, it was suggested to refer to the format and content of the cited prior art patents. Applicant, has taken this statement literally and has typed the application in small print and has included drawings in the cover. The application should be typed in the same format as originally filed. However, applicant should refer to the language and the outline of the specification, drawings and claims of the cited prior art patents.

37 CFR 1.52(b) requires that the pages of the specification including claims and abstract, be numbered consecutively, starting with 1, the numbers being centrally located above or preferably, below, the text. The lines of the specification, and any amendments to the specification, must be 1 ½ or double-spaced. Appropriate correction is required for the above objections.

- ***Claim Rejections - 35 USC § 112:*** The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make

Art Unit: 3711

up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. *Note the format of the claims in the patent(s) cited.*

- **Response to Arguments:** Applicant should submit an argument under the heading "Remarks" pointing out disagreements with the examiner's contentions. Applicant must also discuss the references applied against the claims, explaining how the claims avoid the references or distinguish from them.
- **Certificate of Mailing:** A certificate of mailing should be included with all submitted correspondence. The following is a suggested format a Certificate of Mailing under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.

Conclusion

3. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mitra Aryanpour whose telephone number is 703-308-3550. The examiner can normally be reached on Monday - Friday 9:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Vidovich can be reached on 703-308-1513. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1148.
